Saint Barthelemy Island, discovered by C. Columbus, is a dependancy of Guadeloupe, which is 200 km south of it. The island, Swedish possession from 1784 till 1877, has a population of around 3.000 inhabitants, descendants of Bretons and Normans who settled there in the 17th century. Saint Barth is a duty-free island and attracts tourists thanks to its beaches considered as the most beautiful in the Carribean.

The expedition, organized by the Club DX 24, was made possible by the precious help of our Saint Barth friend, Adolphe Brin.

Specials thanks to Atlas Inc. which sent us the Atlas 350 XL - ICOM 701 - TS 520-Atlas 210 X and 350 XL - Dipoles and Levy - 400 W home made linear.
